

LANGUAGE for SUCCESS

Language for Success is CCLB's newest resource! Funded by the Government of Canada's Skills for Success Program, this online toolkit draws connections between the new Skills for Success (SFS) (formerly Essential Skills) and CLB language skills to support the integration of Skills for Success in second or other language training.

Explore some of the [Language for Success Digital Toolkit](#) components below.

The **Framework** supports language, workforce, and workplace training design and instruction: <https://www.language.ca/resources/expertise/language-for-success/framework/>

Framework incorporating American Sign Language (ASL): <https://www.language.ca/resources/expertise/language-for-success/asl-framework/>

Digital Tools support learners and employees in understanding the connections between the CLB and the nine SFS. They include Can Do Statements, Learning Activities and Self-Assessments: <https://www.language.ca/resources/expertise/language-for-success/digital-tools/>

Digital Tools incorporating American Sign Language (ASL): <https://www.language.ca/resources/expertise/language-for-success/digital-tools-incorporating-asl/>

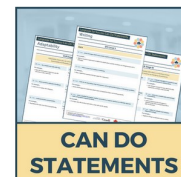

Digital Tools

[Back to Language for Success Digital Toolkit](#)

These digital tools support learners and employees in understanding the connections between the CLB and the nine SFS.

They can be used by:

- **Learners and employees** to identify the language skills that they need to practice for successful workforce integration.
- **Learners, instructors, program developers, employment counsellors and employers** to understand how everyday workplace tasks relate to CLB levels.
- **Instructors and program developers** to inform lesson and program planning and understand how to develop targeted instructional content.

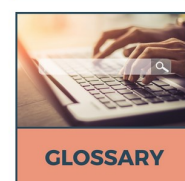

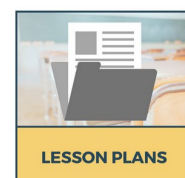

Additional Resources

[Back to Language for Success Digital Toolkit](#)

The Additional Resources are aimed at helping instructors use the Language for Success toolkit.

The Language for Success Toolkit can be used as an opportunity for integrating an active learning approach. For instance, role-plays, case studies, digital device use, reflection and self-assessment are valuable tools for learners to gain practical experience.

Additional Resources are aimed at helping instructors use the Language for Success toolkit. They include Promising Practices, Lesson Plans, Tips and Suggestions for Instructors using the Learning Activities, and more: <https://www.language.ca/resources/expertise/language-for-success/additional-resources/>

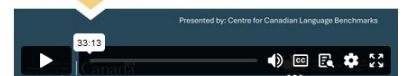

Additional Resources incorporating American Sign Language (ASL): <https://www.language.ca/resources/expertise/language-for-success/additional-resources-asl/>

The **webinars** give you a chance to learn more about the toolkit and how to use it: <https://www.language.ca/webinar-introducing-language-for-success/>

Introducing: Language for Success

What is the Language for Success Toolkit?

"This was very well put together."

"It was super clear and easy to follow."

"It outlines so many important things and it would be so useful for employees to have the toolkit as well as managers, CEO. There is a lot of great information and very useful in different situations it is a great tool to have."

"Clear and easy to go by web page. Nice video, some cool information along the go, I loved it. Something like this should definitely be taken as an example and further implemented into many more web pages."
